

For years I have been warning you to watch for the prices of food to skyrocket as warned by Jesus. In my book I cite the many reports year after year showing us just how high the prices of food are climbing. Below are some of the most recent reports on this issue. I will keep adding to this list below as new reports are issued.

**October 14, 2021 - [Meat Sector Leads Food Price Inflation](#)**

Food prices climbed 4.5% last month, the sixth consecutive month of increases, according to the Consumer Price Index for Food. The increase was led by the meat sector, with the “meat” basket of goods up 12.6% from a year ago while the poultry index was 6.1% higher. [Link](#)

October 13, 2021 - [Kraft Heinz CEO Warns Shoppers: ‘Get Used to Paying More for Food’ Over Inflation](#)  
The CEO of Kraft Heinz, Miguel Patricio, warned that around the world and in the United States, people will have to get used to higher food prices due to “across the board” [inflation](#). [Link](#)

September 22, 2020: Soaring food prices [Link](#)

January 11, 2021: Food Price Inflation Accelerates For Seventh Consecutive Month [Link](#)

March 7, 2021 the [RT](#) news reported food prices still going up. “The agency said that its food price index jumped by 2.4 percent month-on-month to reach 116.0 points in February. The gauge, which tracks monthly changes in the international prices of commonly-traded food commodities, is also 26.5 percent higher than it was a year earlier. The latest increase has become the longest surge for overall food costs since the food crisis broke that out in 2007-08. Prices for sugar soared most, adding 6.4 percent from January, according to the FAO. The agency's sugar price index rose for the second month in a row, reaching its highest level in nearly four years.” [Link](#)

March 13, 2021 - The perfect storm: Global food prices hit six – year high Counting the Cost [Link](#)

April 23, 2021 [Bloomberg news](#) again showed food prices are skyrocketing in their report entitled: “The Grocery Price Shock Is Coming to a Store Near You”. “Corn, wheat, soybeans, vegetable oils: A small handful of commodities form the backbone of much of the world's diet and they're dramatically more expensive, flashing alarm signals for global shopping budgets. This week, the Bloomberg Agriculture Spot Index — which tracks key farm products — surged the most in almost nine years, driven by a rally in crop futures. With global food prices already at the highest since mid-2014, this latest jump is being

closely watched because staple crops are a ubiquitous influence on grocery shelves — from bread and pizza dough to meat and even soda.” [Link](#)

**Sept. 22, 2021** - [Before They Were An Inconvenience, But Now The Shortages Are Really Beginning To Sting](#)

Have you noticed that store shelves are starting to get emptier and emptier? During the panic shopping that was sparked by the start of the COVID pandemic in 2020, there were very intense shortages of certain items, but those shortages did not last very long at all. But now there are widespread shortages in just about every sector of our economy, and they are starting to become quite painful.
